## A Cryptowallet Registration

First of all, you need to make an Ethereum wallet, using which you will store and get Ether and pay for tokens during an ICO. The easiest way is to register an online wallet, for example, at <https://blockchain.info/>.

Just click "Get a Free Wallet."

After a simple registration procedure you get access to your private crypto wallet, where you can store Bitcoin, Bitcoin Cash и Ethereum.

**We are not responsible for any money or cryptocurrency losses, which may happen when you use the services published in this manual. This instruction contains assisting information, you carry out all the actions at your own risk.**

The menu items which are the most important to you are "Send" and "Request" buttons. If you click "Request," you will see your wallet address. This is the address you will use for purchasing Ethereum.

## Purchasing Ethereum

### 1. P2P-system LocalEthereum.com

To purchase ETH we recommend localethereum.com service. It is the most convenient, safe service with minimal fees. After you have registered, you should set parameters for searching offers suitable for you:

Buy – since we want to purchase ether

Bank transfer – in case you are going to pay using your card

Near – you can choose London, or any other city, by it you set a location of a seller (might be important only if you are going to pay in cash in person)

Buy  ether using Bank transfer  near London, England, GB 

Sort by Popularity 

Buy ether from these sellers:

 <a href="#">GTLmarkets</a> 270+ trades	<b>Bank transfer</b> "Fastest Release 24/7"	<b>London</b> United Kingdom	£250 to £5.0K	BUY @ £903.39
 <a href="#">DegenerateFTW</a> 205+ trades	<b>Bank transfer</b> "Fast, friendly & Trusted!"	<b>London</b> United Kingdom	up to £750	BUY @ £663.96
<a href="#">BitcoinInvestKH</a> 205+ trades	<b>Bank transfer</b> "INSTANT! 100% POS FEEDBACK"	<b>London</b> United Kingdom	£200 to £20.0K	BUY @ £627.09
<a href="#">MDeney</a> 40+ trades	<b>Bank transfer</b> "Revolut Payment Takes Seconds"	<b>London</b> United Kingdom	£50 to £1.9K	BUY @ £609.00

Choose a credible seller that offers good rate and has a good record of deals and click the "BUY" button. Enter the number of ether you want to purchase and click «Open Trade.»

## Buy ether from MDenev

### Trade amount

Limits: £50 - £1,900

913.5

GBP

1.5

ETH

OPEN TRADE

You'll be able to discuss the payment details with the seller using end-to-end encryption.

After the deal is opened, you have to wait for a seller to transfer the indicated amount in ether to the wallet of the deal guarantor which is the service itself.

### Bank transfer: Revolut Payment Takes Seconds

#### State

Waiting for funds.

Waiting for the seller to deposit ether to the escrow smart contract. Don't send anything to the seller before funds are in escrow.

Once escrow is funded, you have **2 hours** to make payment.

#### Terms

1.5 ETH

for

£913.50

1 ETH ~ £609.00 incl. fees

- 1 You opened the trade a few seconds ago.
- 2 Waiting for the seller to fund the escrow.

After the service has confirmed receipt of ether, you have to ask for the seller's card details and transfer payment. After that you have to mark it in the service interface (Mark as Paid).

Within a time frame from 10 minutes to one hour you will get ether to your account at local Bitcoin service, you can find it in your profile. There you can also withdraw funds to any external address.

Pros:

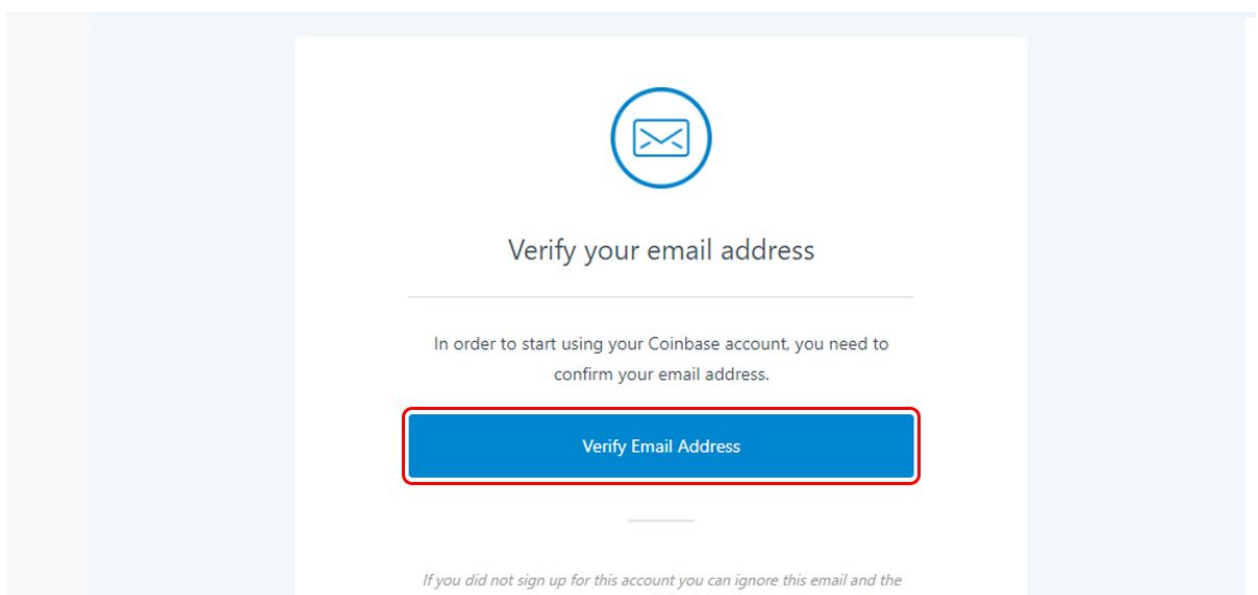

- Low fee – 0,75% for service
- Good rate – as a rule rate at localethereum is 5-10% lower than that of an exchange, which can be especially beneficial while exchanging large sums
- Safety – decentralization acts as a guarantor in the exchange process. This is an option with minimal risk, though nobody can give 100% guarantee that there are no risks at all.

Cons:

- We couldn't find. We really like this way of purchase.

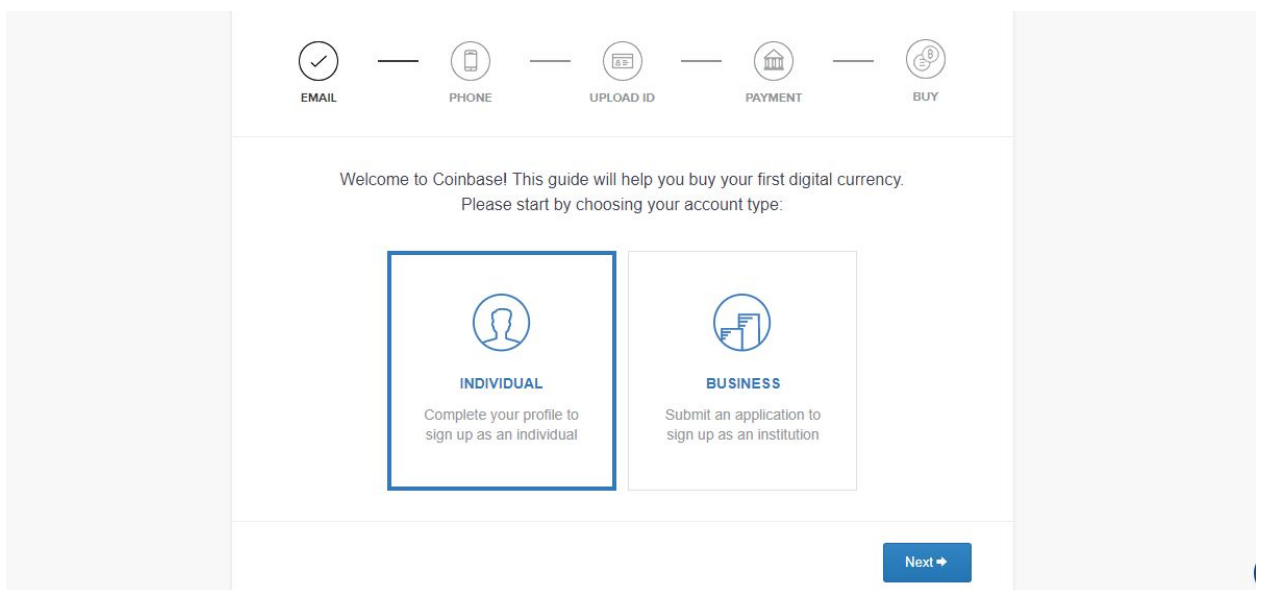

## 2. Cryptocurrencies stock exchanges

For buying Ethereum, we recommend you <http://coinbase.com> stock exchange as it is the most convenient, safe, and the commissions it charges are minimal. After registering in the service, you need to confirm your email address.

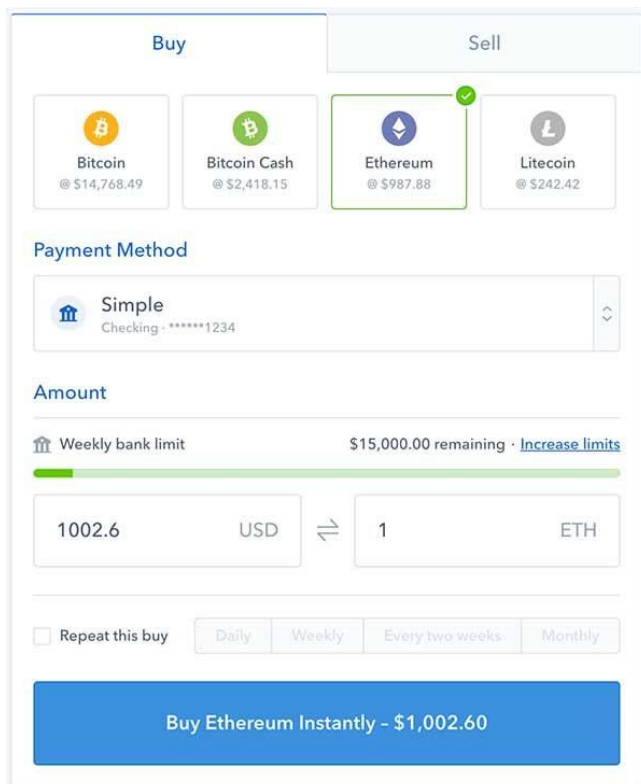

After that, you need to go through the process of account verification and payment details confirmation. It is very important to check that all the information you fill in the fields is accurate.

We are not responsible for any money or cryptocurrency losses, which may happen when you use the services published in this manual. This instruction contains assisting information, you carry out all the actions at your own risk.

The image shows the initial steps of a Coinbase account setup. At the top, a horizontal flowchart consists of five circular icons connected by lines: a checkmark for 'EMAIL', a smartphone for 'PHONE', a document with a checkmark for 'UPLOAD ID', a bank building for 'PAYMENT', and a coin with a plus sign for 'BUY'. Below this, a central text block reads: 'Welcome to Coinbase! This guide will help you buy your first digital currency. Please start by choosing your account type:'. Underneath are two large, light-blue rectangular buttons. The left button is titled 'INDIVIDUAL' and features a person icon; its text says 'Complete your profile to sign up as an individual'. The right button is titled 'BUSINESS' and features a building icon; its text says 'Submit an application to sign up as an institution'. The 'INDIVIDUAL' button is highlighted with a blue border. At the bottom right, there is a blue button labeled 'Next >'. The entire interface is flanked by light gray vertical bars on the left and right sides.

Next, proceed to the "BUY / SELL" section to purchase cryptocurrency.

The image displays the 'Buy' section of the Coinbase interface. At the top, there are two tabs: 'Buy' (active) and 'Sell'. Below the tabs is a row of four cryptocurrency cards: Bitcoin (orange icon, price \$14,768.49), Bitcoin Cash (green icon, price \$2,418.15), Ethereum (purple icon, price \$987.88), and Litecoin (gray icon, price \$242.42). The Ethereum card is highlighted with a green border and a green checkmark in its top right corner. Below the cards is a 'Payment Method' section showing 'Simple' as the selected method, with 'Checking - \*\*\*\*\*1234' listed below it. Underneath is an 'Amount' section. It shows a 'Weekly bank limit' of '\$15,000.00 remaining' with a link to 'Increase limits'. A progress bar is visible below the limit. The main input area shows '1002.6' in a box, followed by 'USD', a double-headed arrow, a box with '1', and 'ETH'. At the bottom, there is a checkbox for 'Repeat this buy' and four frequency buttons: 'Daily', 'Weekly', 'Every two weeks', and 'Monthly'. A large blue button at the very bottom reads 'Buy Ethereum Instantly - \$1,002.60'.

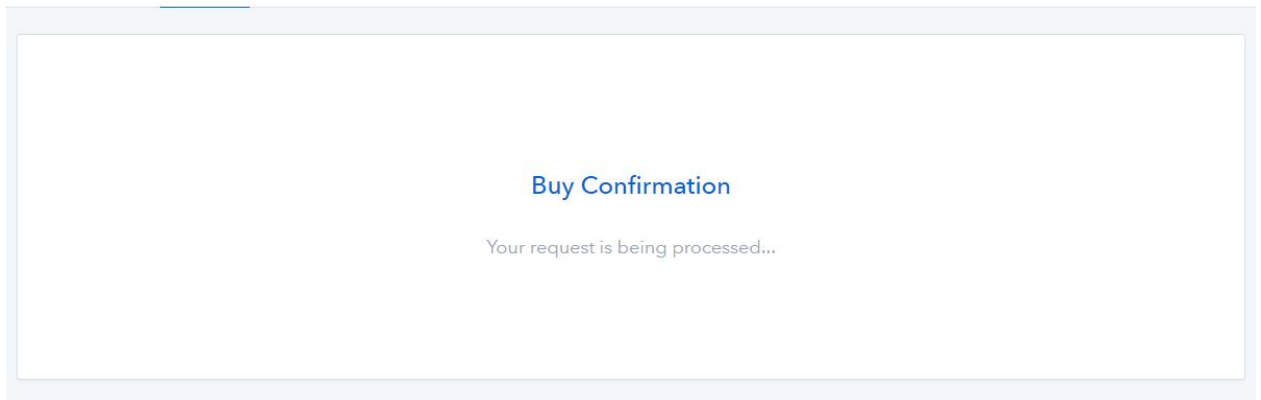

Choose a payment option and set the required sum in Ethereum to make a purchase.

To confirm the transaction, click the "Confirm Buy" button.

We are not responsible for any money or cryptocurrency losses, which may happen when you use the services published in this manual. This instruction contains assisting information, you carry out all the actions at your own risk.

Wait for the transaction to be confirmed. Depending on the Ethereum network workload, this process can take from 3 to 15 minutes.

[Dashboard](#) [Buy/Sell](#) [Accounts](#) [Tools](#) [Settings](#)

Now that you have Ethereum on your account balance, you can withdraw them to your blockchain.info wallet, which you have created earlier.

We do not recommend sending Ethereum directly from the exchange to our wallet to purchase MyDFS tokens. In case of the transaction cancellation, it might be impossible to receive your funds back. The safest way is to withdraw Bitcoins to your blockchain.info wallet and only then proceed with the token purchase.

Pros:

- Reliable - in the process of exchange, there is an authoritative payment service and no less authoritative exchange. This is an option with minimal risk, although the risk still exists - the exchange can be hacked and taken away all funds from accounts (for example, this happened in August 16 with one of the largest exchanges of Bitfinex). However, this happens infrequently and the likelihood that it will happen in the few minutes, when you buy Bitcoins, is insignificant.

Cons:

- More actions - to buy Ethereum through the exchange, it is necessary to use two services and understand the interface of the exchange. However, difficulties can arise only the first time, then everything happens quickly and easily.
